

SUMMARY SPEECH OF THE KHALIFATULLAH HAZRAT MUNIR A. AZIM

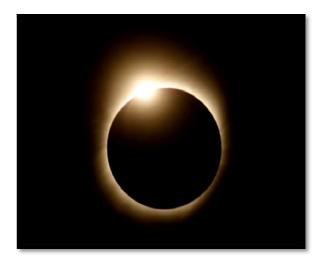

Study Circle

November 2, 2013 (28 Zil-Hajj 1434 AH)

(AFTER PERFORMING SALAT-UL-KUSUF & DUAS)

The Eclipses: Divine Signs?

After welcoming all members and guests, the Khalifatullah (May Allah be pleased with him) began his speech with the Tashahhud, the Ta'uz, Surah Al-Fatiha, and then said:

There is a lot of speculation among the Hindus and Tamils and that especially on the total or hybrid solar eclipse that will take place tomorrow Sunday, November 3, 2013. The reason for this is that once again, a total solar eclipse will take place on Diwali. And this time, the eclipse will be partially visible in Mauritius, while last year (13-14 November 2012) it was not.

Mauritians of Hindu/Tamil faiths ask the question: What will happen? What sign is this, that the sun will be eclipsed during their holiday, a holiday that is celebrated on the victory of light over the dark forces?

It should be noted that since 1762, this is the fourth time a total eclipse of the sun is revealed on the day of the Festival of Lights (Diwali or Deepawali):

- October 17, 1762
- October 24, 1995
- November 13, 2012
- November 3, 2013

© 2013 Jamaat Ul Sahih Al Islam

According to various beliefs on the subject, this phenomenon brings destruction and calamity for the peoples of the earth, while for others it is a harbinger of good things.

Mahatma Surdasji prophesied that when the Kalki Avatar shall appear, the moon and the sun would be eclipsed. He writes:

"The moon and the sun would both be eclipsed and violence and death will increase." (Surgagur)

In the holy book of the Sikhs, Sri Guru Garanth Saheb, it is written: "When Maharaj will come as Nahkalank, the moon and the sun shall be his helpers." (18-20)

In the New Testament, Jesus (as), describing the signs accompanying his second coming, says: "Immediately after the tribulation of those days shall the sun be darkened, and the moon shall not give light." (Matthew 24: 29)

According to the last law-bearing Book, the Holy Quran and the sayings of the Prophet of Islam, eclipses are signs of God Almighty of the approach of the Hour, the Day of Judgment.

Hazrat Ibn Umar (ra) reports these words from the Prophet Muhammad (pbuh):

"The sun and moon are not eclipsed because of the birth or the death of anyone, but they are among God's signs. When you see them, pray." (Bukhari)

The Hadith is reinforced by the fact that the Holy Quran mentions eclipses as important signs of the Day of Resurrection.

"He (man) asks: 'When is the Day of Resurrection?' When the sight is dazed, and the moon is eclipsed, and the sun and the moon will be reunited..." (75: 7-10)

The Holy Prophet Mohammad (pbuh) was blessed with a vast knowledge of hidden things. He predicted that in the last days, when the world (humans) shall move away from God, the Messiah would be raised, through which the rebirth/reformation of Islam would operate and faith would be restored. He mentioned various signs that would occur to mark the arrival of a messenger from God. Among the many signs to manifest on the arrival of the Promised Messiah or Messenger of God, there shall be heavenly signs, lunar and solar eclipses, especially two specific eclipses that will occur one after another in the same month of Ramadan.

If we look from the beginning of the century 2001-2013, we see that there have been several eclipses, especially total lunar and solar eclipses in the same month of Ramadan in the year 2003 – **09 & 23 November 2003** respectively, which proves the veracity of this humble servant of this century. For the last ten years (2003-2013):

LIST OF ECLIPSES (2003-2013)

In short, the prophecy of our beloved master, the Holy Prophet (pbuh) was accomplished with great precision and in the most elegant way.

"... So blessed is Allah, the Best of Creators." (23: 15)

The Holy Prophet (pbuh) made such stunning prophecy on the basis of knowledge he acquired directly from the Omniscient God.

O ye Hindus brothers and sisters of Mauritius and other countries, ponder over this festival of lights (Diwali) carefully for it is – the victory of light over darkness, victory of good over evil. Remember all that I have told you yesterday in my sermon on Friday (November 1, 2013):

"... The light is when Ram was victorious with his coming. He was a man of God who was illuminated with the (divine) teaching and gave the message of God (to others). He came with a great victory when the light was victorious over darkness.

Beware that it becomes a black dot in the faith of Hinduism where many (Hindus) know that this Sunday is the Diwali festival and also there will be an eclipse, from 2:00 in the afternoon until (about) 7:00.

So yes, a symbol it is when good gains victory over evil, light spreads, where the Good God heard the prayer of His servant. As a reward, to celebrate the victory of light, it is celebrated with sweet cakes to share the sweetness with others. See how our Lord, our Creator made us (believers) victorious over darkness.

When you go outside, you can see the lights illuminate, the houses are beautifully illuminated, but if your hearts are still concealing hatred and your faith is always in the dark, and you go back more than 5000 years ago on the teaching of Ram, Krishna, then the celebration of Divali just becomes a routine, a party. Ram and Krishna were messengers of God, holy and pious men, who fought to spread the oneness of God, not to bring division or hatred or racism or communalism. This is the work of all the prophets ..."

So you cannot imagine a better sign than this to let you know about the arrival of the Avatar in Mauritius and worldwide.

Good news for you, O brothers and sisters of the Community; congratulations to you, O community friends. The brightness of the beneficence of God became manifest and the way is open for those who can and want to see. The sun and the moon eclipsed in these countries, by divine decree, a prophecy of good news; the arrival of the Avatar was done (since the beginning of this century and to this day) through a way so pure that it contains no imperfection.

Today all exalted souls shed tears of joy in remembering the blessings of Almighty God, in recognition of the fulfilment of the prediction of our beloved prophet Hazrat Muhammad (pbuh), the universal prophet.

I thus conclude (this speech) with a Hadith. The Holy Prophet Mohammad (pbuh) said: "Al-Mahdi, the vicegerent of Allah shall appear. Even if you have to go crawling beyond the mountains, on the ice, you have to go to him with my greetings of peace and give him the oath of allegiance because that Mahdi shall be a vicegerent of Allah." (Sunan Ibn Majah Vol.2)

May Allah give you salvation to recognize the Avatar of this century. Islam is the perfect religion which holds the belief in all the prophets since the beginning of time. So I invite you all my brothers and sisters of Hindu/Tamil faith to Islam in this century as the Avatar you are looking for is in Islam and there is among you one (avatar) in this century, in your time to guide you to one God, our Creator, Who has no associates and Who is the Sustainer of all the worlds. May Allah open the eyes of your souls to recognize the essence of Ram, Krishna which God has sent for you to get you out of darkness, *Kalyug* and to pave for you the way to the eternal light. *Insha-Allah* (If Allah wills).
