## ~ A SPECIAL WARNING AGAINST THE EBOLA VIRUS ~

### ADDRESS OF THE MESSENGER OF ALLAH

HAZRAT KHALIFATULLAH

MUNIR A. AZIM <sup>(ATBA)</sup>

### TO ALL MAURITIANS & MANKIND

(05 August 2014 – 08 Shawwal 1435 AH)

After reading the Tashahhud, Ta'uz and Surah Al Fatiha, the Messenger of Allah, Khalifatullah (atba) said:

My fellow Mauritians and O mankind!  
*May the peace of God be upon you.*

As the Khalifatullah, representative of God of this era, I must alert the entire humanity on what Almighty God warns us in His Holy Book, the Quran:

**“Corruption has appeared throughout the land and sea by what the hands of people have earned so He may let them taste part of (the consequence of) what they have done that perhaps they will return back to Allah.”**

All countries are at risk because many people including the Mauritians travel to Africa. This also applies to those people who hails from African countries and often travel to several countries and come also to Mauritius. So it is my duty to warn the entire humanity against the Ebola epidemic. There is no remedy against this virus and if this virus comes to be introduced into any country in the world, or even here in Mauritius, we risk finding ourselves in a serious situation, especially as the infected people need to be isolated (Quarantined).

Unfortunately the existing health structures are not adequate to isolate several patients. Therefore the necessary steps shall have to be done to remediate the situation. The virus is transmitted through bodily fluids such as saliva and sweat. The incubation period of virus is from 2 to 21 days, that is to say the period between infection and the appearance of symptoms. Sudden onset of fever with severe muscle pain in the head (that is, headaches), sore throat, vomiting, diarrhoea, rash, kidney and liver failure and internal and external bleeding, these are the severe symptoms of Ebola

which can be fatal. According to the latest report of the World Health Organization (WHO) of 27 July, 1300 cases were identified. Among 729 fatal cases, 339 in Guinea, 233 in Sierra Leone and 156 in Liberia. The Ebola epidemic is advancing faster than the controls. At this rate, the situation may get worse, the consequences can be fatal. It can also disrupt the socio-economic situation and the risk of spreading (of the virus) to other countries are very strong. Before the high risk of contamination, governments around the world must take more stringent measures.

O humanity! Direct your face toward the right religion before there come from Allah the day which cannot be averted. That day people will be divided: one who disbelieve will suffer (the consequences) of his infidelity. And whoever worked in righteousness... it's for their own (good/future) that they are preparing doing so, that by His grace God may reward those who believe and do good works. Verily, God does not love the unbelievers.

O humanity! Listen to me! Turn (in worship) to one God. Ask much forgiveness for your sins which have filled the earth. Pray Almighty God night and day with great devotion, submit totally to the command of God so that He may rid us from these viruses such as Ebola and other strange bacteria and viruses that are constantly appearing in this century, and which are fatal. Humanity is in danger in all circumstances. Join me in prayer to the One God that He may, God-willing (*Insha-Allah*) forgive us. *Ameen*.

Thank you for your attention. *Assalamu Alaikum Warahmatullah Wabarakaatuhu.*
